AI AND PROJECT MANAGEMENT: MY EXPERIENCE AS A PANELIST AT APMC 2023 BY PREETA NAIR

Invited by the Project Management Institute Malaysia, I had the honour of speaking at the Asset and Project Management Conference 2023. Organized by the Public Works Department of Malaysia and the Malaysian Asset and Project Management Association, with UEM Edgenta's backing, the event brought diverse minds together.

My presentation, 'Use of Artificial Intelligence in Project Management,' aimed to simplify AI's complex landscape. I discussed AI's pivotal role in business, enhancing operational efficiency and productivity. Further, the introduction of AI tools in project management was explored, highlighting their potential in streamlining processes like decision-making and risk management.

The final note was on initiating an organization's AI journey, emphasizing a strategic approach and the importance of managing the resultant change. The presentation concluded with a dynamic Q&A session, facilitating a vibrant exchange of thoughts and experiences.

The Asset and Project Management Conference 2023 was an enriching platform that underscored the significance of AI in project management. Such gatherings play a crucial role in shaping the future of the field, and I was thrilled to contribute to the discourse.

Great things happen when you are with PMI!
